And it has a dandelion as its logo. It is a very small theme (about 40 kB in total). Using your mouse, you can configure all the aspects of the theme. Features: Sky color (the wallpaper color) Window color (the entire window color except the active window color) Transparent Windows Corrupted Bevels and Shapes Every Window Resizable Every Window Maximizable You can turn the theme on/off, adjust the window color and set a sky color. Just right-click on the dandelion logo and set the preferences. Also the user interface is customizable. Sky color: The program does not only use sky color (the wallpaper color) as a background for the desktop. Because of the time that is passed, also the active window color is the wallpaper color. As a consequence of this system, the background of your desktop is mostly the sky color and the active window color. You can set the wallpaper color to the sky color, because the windows will look normal. Transparent Windows: If you set the active window color to the sky color, then Windows will have a transparent background. It is now possible to see through to the desktop that is behind.
